

Description of data and command files for
 "Cooperation under the Shadow of the Future: Experimental
 Evidence from Infinitely Repeated Games"
 by Pedro Dal Bó

The Stata data file is datashadow.dta.

The Stata do file is maketable.do. It contains the commands for the results presented in the paper.

Next is a short description of the variables in datashadow.dta.

Variable	Description
idnew	unique id
idnew2	unique id of partner
session	1 if $H=1$ or $\delta=0$, 2 if $H=2$ or $\delta=1/2$, 3 if $H=4$ or $\delta=3/4$
matchs	match # in the session (0 is practice match)
match	match # counting from beginning of the experiment
round	round # in the match
id	experiment id (starts from 1 in each experiment)
id2	id of partner
points	earned points in the round
date	date!
finite	finite or dice depending of the type of experiment
dice	dummy=1 if dice
pd1	pd1 or pd2 depending on the payoff matrix
pd2	dummy=1 if pd2
usd	usd or normal depending on order of treatments
normal	dummy=1 if normal
coop	dummy=1 if subject chose C
coop2	dummy=1 if partner chose C
matchshalf	dummy=0 if matchs 1-5, 1 if matchs 6-10
outcome	1 if CC, 2 if DC, 3 if CD and 4 if DD
cc	dummy=1 if outcome=CC
cd	dummy=1 if outcome=CD
dc	dummy=1 if outcome=DC
dd	dummy=1 if outcome=DD
cdydc	dummy=1 if outcome=CD or DC
anyecon	dummy=1 if major of subject is econ or business econ

Variable	Description
session1	dummy=1 if session 1
session2	dummy=1 if session 2
session3	dummy=1 if session 3
delta1	dummy=1 if $\delta = 0$
delta2	dummy=1 if $\delta = 0$
delta2	dummy=1 if $\delta = 0$
h1	dummy=1 if $H=1$
h2	dummy=1 if $H=2$
h3	dummy=1 if $H=4$
colorr	dummy=1 if subject was row/red player
earning	\$ earned in round
totearn	total \$ earned in experiment

The data for footnote 17 are in dice.txt. The analysis is straightforward.
